**DETAILED ACTION*****Election/Restrictions***

Applicant's election with traverse of group I comprising claims 1 – 16 in the reply filed on 8/21/2006 is acknowledged. The traversal is on the ground(s) that the inventions are interrelated and no serious burden would be placed upon the examiner during examination. This is not found persuasive because each of the inventions are classified in separate classifications and the examination process would require a different field of search. As discussed in the restriction requirement, the different inventions involve different issues (e.g., method steps pertaining to how the apparatus is made or assembled during use) that would involve different considerations in determining patentability. Clearly, different searches and patentability determination issues are involved in the examination of each invention. Claims 17 – 20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention. The requirement is still deemed proper and is therefore made FINAL.

***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the tube-like passageway must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

Art Unit: 1743

number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 – 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 – 16 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: Regarding claim 1, it is unclear as to how the predetermined location is positioned relative to the tube-like passageway. The tube-like passageway does not appear to be shown in figure 1. The structure which goes to make up the device must be clearly and positively specified. The

Art Unit: 1743

structure must be organized and correlated in such a manner as to present a complete operative device.
